Author, *Chimurenga - the Liberation Struggle in Zimbabwe*

With the Zimbabwean elections just around the corner, imperialism is once again stepping up its propaganda efforts against the Zimbabwean state, labelling it an "outpost of tyranny". Their dearest wish is to oust Zanu-PF and replace it with an administration that will willingly submit to the unlimited plunder of Zimbabwe's resources by the multinationals. Come and hear comrade Mumbengegwi talk about the situation on the ground in Zimbabwe.

CHIMURENGA!

The liberation struggle in Zimbabwe

Editor: Harpal Brar

"The struggle against imperialism must be fought and fought in the interests of the masses of Zimbabwe" (Robert Mugabe)

The material presented in this book tells the story of Zimbabwe's national revolutionary struggle for liberation from the clutches of racism, colonialism and imperialism - beginning with the armed struggle for independence and culminating in final resolution of the most fundamental question of the liberation struggle, namely, the restoration of the land of Zimbabwe to its people.

It emphasises, firstly, the necessity for the proletarian revolutionary movement in the imperialist countries to support the national revolutionary movements of the oppressed people, and, secondly, the economic roots of opportunism in the working-class movement in the imperialist countries and the necessity of exposing and fighting against opportunism and the inevitability of a break with it.
